

# Supercharge your streaming with Sub Mini

Sub Mini is the compact subwoofer that boosts your films, music, and games with added bass. Pair with Beam or Ray for more immersive TV content, or enjoy more depth and clarity for music when you pair with One, One SL, or a SYMFONISK speaker.

- **Bold Bass:** Feel more immersed in every scene and song with rich, clear, and balanced bass that's perfect for small to medium-sized spaces.
- **Balanced Sound:** Force-cancelling woofers generate deep, dynamic low end while neutralising buzz, rattle, and distortion. Advanced digital signal processing maximises bass response and reproduces the full-toned low frequencies expected from a much larger subwoofer.
- **Adaptable:** Sub Mini handles the low frequencies so paired speakers like Beam, Ray, One, or One SL can focus on more mid-range and high frequencies for a richer, more powerful sound experience all around. Trueplay adjusts the sound even further for your space.
- **Curvy Design:** Sub Mini was designed with a compact, elegant cylinder design that's unlike any other subwoofer. Place it beside your sofa or credenza without pulling focus from the TV or your interior style.
- **Effortless Experience:** Once you plug in the power cable, the Sonos app will automatically detect Sub Mini and help you add it to your system. Adjust the TV volume with your remote or change the music from the Sonos app, Sub Mini stays synced with its paired speaker.
- **Expand Your System:** Mix and match Sub Mini with any Sonos soundbar or non-portable speaker to create your sound system. Add on when you're ready to enjoy more immersive home cinema, music in every room, and great sound on the go.

## Audio

### Woofers

Dual 6" woofers face inward toward each other for a force-cancelling effect.

### Amplifiers

Both Class-D digital amplifiers are perfectly tuned to the unique acoustic architecture.

### Architecture

Sealed cabinet neutralises distortion and enhances the bass response.

### Adjustable EQ

Audio settings automatically equalise to balance Sub Mini and the paired Sonos product(s). Use the Sonos app to manually adjust bass, and loudness.

### Trueplay

This software measures the acoustics of the room then fine-tunes the sound. Supported iOS device required.

### Frequency Response

25 Hz

## Details

### Dimensions

Height: 12 in (305 mm)  
Diameter: 9.1 in (230 mm)

### Weight

14 lb (6.35 kg)

### Finish

Matte; Available in Black or White

### Join Button

Press once to add Sub Mini to your system during setup if necessary.

## Power and Networking

### WiFi

Connect to WiFi with any 802.11a/b/g/n broadcast-capable router.

### Low Latency

5 GHz connection to a Sonos soundbar enhances audio transmission speed for high-quality sound synced with your TV.

### Ethernet

10/100 port for hardwiring to your router.

### Voltage

100-240V 50/60Hz internal power supply
